“I LOVE NATURE”
Exhibition

6 - 28 June '09

IKEA Tampines Level 2 60 Tampines North Drive 2

In this imaginary world of friendly recycling robots and fantasy creatures, see how the kids and the young at heart share their ideas and thoughts in going green. Find out how everyday discarded materials like paper, metal and plastic can be reinvented into sculptures and other useful things.

You can take part in a giant boardgame and see a video documentation of the production of the exhibition and ways to go green.

An exhibition initiated by students from Berries World of Learning School and curated by Studio Haroobee.
